18 MAY 1983

REAL ESTATE AND CONSTRUCTION DIVISION WEEKLY REPORT FOR PERIOD ENDING MAY 18, 1983

- 1. Progress Report Tasks Assigned by the DCI/DDCI:
 None.
- 2. Items or Events of Major Interest That Have Occurred During the Preceding Week:

Agency-Expedited Construction Contract - In Fiscal Year 1982, the Agency had requirements to expedite the installation of electrical power and chilled water in Room GC-03, Headquarters Building, and the site preparation for a laser plate making facility, Printing and Photography Building. Using in-house designs and with the General Services Administration approval, a contract was negotiated from bids from a selected list of contractors. The two projects were tracked separately since the source of funds and the completion dates were different for each.

The longer project at the Printing and Photography Building was still in progress when Project 4C was approved on an expedited basis. Using in-house designs, this work was added to the contract via negotiation.

The beneficial occupancy dates were met for each project. The laser site work, however, needed further modification to accommodate changes in the equipment manufacturer's specifications while 4C had changes for updated equipment requirements and layouts as well as security support.

The funding combined money from the Offices of Logistics, Data Processing and Security (via ODP). In summary:
